THIS IS UNEVALUATED INFORMATION

1. An auxiliary airfield has been constructed approximately one kilometer south-
west of Debar. The length of the field is 1,200 meters and the width is from
500 meters to 600 meters; its axis extends from east to west.
2. The surface of the field is hard-packed earth, and it is bordered by a lime-
stone wall which is one meter thick. There is a lime-stone circle 25 meters
in diameter in the center of the field.
3. Although there are no hangars at the field, there is a small wooden barracks
with a tower seven to eight meters high, on which there is a weathervane. A
telephone connects the barracks with the military unit in Debar, which guards
the field.
